Confused by Environmental Regulations?

SBEAP Can Help

SMALL BUSINESS ENVIRONMENTAL ASSISTANCE PROGRAMS (SBEAP)

Helping Small Businesses & the Environment

Are you a small business owner? If you...

- Bake
- Coat
- Dry clean
- Electroplate
- Fabricate
- Finish
- Manufacture
- Paint
- Print
- Repair automobiles
- Service refrigeration or air conditioning equipment
- Woodwork
- And much more...

...You are likely to be affected by one or more provisions of the 1990 clean air act amendments.

What are the Small Business Environmental Assistance Programs?

Created by congress under the clean air act amendments of 1990, the Small Business Environmental Assistance Programs (SBEAP) operate in 50 states, 2 territories and the District of Columbia to assist small businesses in meeting their federal, state, and local environmental requirements.

Each program is comprised of three components:

- 1 A technical assistance component to provide the specific help that small businesses need;
- 2 An ombudsman function to advocate on behalf of small businesses within the regulatory environment; and
- 3 A compliance advisory panel made up of small business owners and representatives to consult and advise on program content.

The SBEAP can provide:

- Free, personal technical and compliance assistance delivered by a nonregulatory program¹;
- Copies of environmental rules and regulations;
- Fact sheets and other user-friendly publications written in everyday language summarizing various environmental rules; and
- Workshops and training on environmental issues, and more!

Each year the SBEAP reach approximately 1,300,000 small businesses nationally through assistance activities, such as:

- Publications
- Workshops
- Helplines
- One-on-one assistance
- Referrals to other service providers, etc.
- Site assessments
- Exhibits
- Record keeping tools

¹ The SBEAP receive no Federal funding and are supported by state air permitting fees. Staffing, budget, and range of services vary.
